

ANNOUNCEMENT

TO: Georgia FIRST PeopleSoft Financials Users

POSTED: December 20, 2021

SUBJECT: Georgia FIRST Financials Application Access from Virtual Private Network

(VPN) Only

In response to the <u>Apache Log4j vulnerability</u>, ITS implemented several security safeguards to protect the Georgia *FIRST* Financials application. These safeguards help keep external threats from gaining access through that vulnerability while measures are put into place to mitigate the specific threat.

One of the safeguards ITS implemented was blocking access to the application from general connections via the web without an approved VPN connection. The application is still accessible from remote locations, however for now it is only accessible through the institution's VPN.

At this time, ITS requests all Georgia FIRST Financials users connect to their institution's VPN prior to accessing the Georgia FIRST Financials application. We regret any inconvenience this may cause and will provide additional updates and guidance if the situation changes.
