

## ATTACHING RECEIPTS TO TRAVEL & EXPENSE TRANSACTIONS

PeopleSoft Financials Travel & Expense module offers the ability to add attachments to each of the following expense transactions: Travel Authorizations, Cash Advances and Expense Reports.

Attachments in the form of supporting documentation and/or receipts can be attached electronically from the top right-hand section of the Travel Authorization, Cash Advance and Expense Report pages; this allows documentation to stay with the transaction as it navigates through the approval workflow. Additionally, employees, users and auditors can access these attachments from the transaction at any time and this functionality allows for a paperless documentation process.

Employees can add attachments to a transaction in 'Pending' status before the transaction is submitted for approval. Approvers can add attachments to a transaction after it is submitted by an employee and while it is in 'Approvals in Process' status. However, no additional attachments can be added once a transaction is in 'Approved' status.
